

# The CartonmoverErgo is free roaming and unloads EVERYTHING!

**Ideal for the unloading & loading of: Cartons (small or large ), Tyres  
Parcels Furniture Bags, White and Brown goods.**

In fact, whatever it is, if it needs unloading then the CartonmoverErgo can handle it  
From the lifting platform the operative is always in the most ergonomic position to  
take the cartons out of ocean containers and / or trailers.

The top cartons are NOT above shoulder height.. The operator,s head is just below  
the container roof. The lifting platform is adjustable.

The cartons/goods to be unloaded are simply pushed onto the 900mm wide belt.....  
Fast and efficiënt.

The cartons on the floor are only lifted 30 cm with Liftassists being available. With the robust CartonmoverErgo you can unload up to 1800 cartons (based on a size of 400x600mm) per hour. Great throughput ...And your staff remain less fatigued and healthier. Connected to the ErgoMover there are several standard harmonica & telescopic conveyor solutions available from our business partner PewiSys.

With this handy and flexible unloading innovation you can drive sideways from Dock to Dock as well as free roaming to other areas.

When the job is done you just park the compact (4.5m) CartonmoverErgo anywhere and the expedition-inbound area is then clear ...and so immediately ready for other business.

#### Specifications

Max. Load dimensions:	1.800 x 1.800 mm
Max. load weight:	130 kg/m
Width lifting platform:	2.000 mm
Max. height of lifting platform (from floor):	800 mm
Discharge belt: Lowest - highest position	300-2.000 mm
Power supply for 900 mm wide belt conveyor:	400V/16Ah
